**Subject:** NAS Banana River Off-Base Disposal Area - Status Update  
**Date:** Monday, April 25, 2022 9:05:20 AM

---

The U.S. Army Corps of Engineers' (USACE) development of the Remedial Investigation/Feasibility Study workplan is ongoing. While we have received rights-of-entry covering a significant portion of the Off-Base Disposal Area, lack of rights-of-entry will impact our understanding of site conditions. If we determine there could be impacts on one property that extends to a neighboring property where we do not have right-of-entry, we will have a "data gap" – or an incomplete picture of the potential Navy-related impacts.

If gaps in where we can conduct fieldwork (where we have not received a signed right-of-entry) exist when fieldwork begins, we will complete the fieldwork based upon where property owners have given us access. We will make every effort to characterize the nature and extent of Navy-related impacts based on where we are able search.

While the deadline to receive signed rights-of-entry has passed, we encourage all property owners who received and have not yet signed the form to do so as soon as possible. If someone signs the form after we start fieldwork, we cannot guarantee that property will be investigated.

If you have not watched the Remedial Investigation/Feasibility Study virtual meeting video posted November 5, 2021, we encourage you to view it here. <https://youtu.be/Cc2lVP0pqBg> The video explains more about the project and preliminary fieldwork plans.

If you have any questions or concerns about the Formerly Used Defense Site, please contact us directly at 800.710.5184 or [FUDS.Florida@usace.army.mil](mailto:FUDS.Florida@usace.army.mil). Project information is also on the website ([www.saj.usace.army.mil/BananaRiver](http://www.saj.usace.army.mil/BananaRiver)).
